

Capability Statement

Deceris is an award-winning provider of strategic technology and business solutions to the Federal Government. Our team provides services organized in four areas: Information technology Solutions; Program Acquisitions, Strategic Communications, Outreach, and Training; Scientific and Engineering Technical Assistance; and Program Management, Operations, and Support. We are an experienced team and our clients praise our work for our customer service and innovative solutions.

As a Service-Disabled Veteran-Owned (SDVO) teamed with a Small Business, Deceris is committed to excellence and creating innovative and flexible solutions for our Federal clients.

Partnered with Total Service Solutions a minority Information and Communication Technology (ICT) firm with over 20 years of successfully bringing cost effective ICT solutions to fortune 500 companies, our team will bring you the most innovative solutions required by your agency.

What sets Deceris apart from the competition?

- ★ Performance-Based Processes
- ★ Integrated Solutions Teams
- ★ Client Relationship Management
- ★ Strategic Mix of Technology and Business

PAST PERFORMANCE

PROJECT NAME

Technology Assessment for Africa Schools

Contract Number	8523201531
Contract Start and End Date	4/10 – 09/10
Contracting Officer (Name and Address)	Joe Kitts Managing Director Africa Education Initiative (AEI) Ronald Regan Building
Contracting Officer Telephone Number	(202) 712-0485
Contract Value	\$1,350,000.00
Contract Type	Technology and Infrastructure Assessment for Schools in Africa

Description of Work

Discussion on USAID Africa Education Initiative's (AEI) legacy on education in Africa has led to current initiative emphasis on areas in appropriate technology, institutional impacts and alignment, outreach and sharing of best practices. Technology is not the barrier in Africa it once was. AEI is interested in identifying the most appropriate technologies for AEI education applications and sharing widely. AEI's impacts and institutional successes have not been systematically approached. AEI is interested in exploring opportunities to align activities for synergy and strength. Outreach to stakeholders at all levels improves AEI's reputation and creates sustainability as well as awareness. Outreach for sustainability might create jobs and self-sustaining programs. Outreach for awareness creates strong partners and supporters. Activities to increase the circulation of the AEI message as well as potential resources may include strategic contact.

PROJECT NAME	Design Africa Community Resource Center
Contract Number	GS00KI97AFD2195
Contract Start and End Date	3/02 – 12/04
Contracting Officer (Name and Address)	Dr. Sarah Moten Director Educational Development and Democracy Initiative (EDDI) Ronald Regan Building
Contracting Officer Telephone Number	(202) 712-0222
COTR (Name and Address)	Aleta Williams (Program Manager) EDDI Ronald Regan Building
COTR Telephone Number	(202) 712-1516
Contract Value	\$9,500,000.00 US
Contract Type	Developed 7 Community Resource Center and Training

Description of Work

TSS was contracted by USAID to design, develop, and implement the technical infrastructure proposed for the Education for Development and Democracy Initiative (EDDI) for 17 Community Resource Center (CRC) 6 in Nigeria and one in the following 7 countries

(Tanzania, Mauritius, Swaziland, Mauritania, Mali, Namibia, and Congo). TSS analyzed the overall project requirements, and developed a project plan to accomplish the implementation of the various components. The project was comprised of the following major elements:

- Site assessment, evaluation and recommendations;
- Network Cabling Design and Implementation, including Fiber-optic linkage of two campus buildings;
- Internet broadband evaluation and installation;
- Multi-media PCs, Workstations, Operating systems, and Applications Installation;
- Video Conferencing evaluation and implementation; and
- Electronic Training Approach and Materials identification and implementation.

Contracting Officer Telephone Number	(301) 457 - 2839
COTR (Name and Address)	Howard Prouse Bureau of Census 4700 Silver Hill Rd Bldg 3 Suitland MD, 20746

COTR Telephone Number	(301) 457 - 1933
Contract Value	5,990,000.00
Contract Type	Client / Server Development And System Integration

Description of work

TSS analyzed, designed and implemented over the course of ten (10) years several Enterprise wide client/server Applications for the **Bureau of Census**. TSS staff is currently providing project management, requirements analysis, help desk support, software design, database design, implementation, and operations for several projects within the Bureau of Census. TSS staff is instrumental in the success of these systems, ongoing development, and help desk support of the Client/Server Decennial 2000 and 2010 census taking system.

TSS continues to provide application and help desk support the nationwide Census applications that collect data that is used for accurate statistical reporting for the U.S Census. The TSS staff also designed and developed the Integrated Coverage Measurement System (ICM2000) that uses the Personal Digital Assistants (PDA) that is being used to record and track the progress of

the various ICM operations for the U.S. Census in the year 2004. The PDAs are used by all field agents conducting neighborhood surveys. Different PDAs were tested for all messaging communications to the main wireless devices for transfer information directly from the PDA to the centralized database. The system has also been designed for notification and handles power failures, faulty machines, and any other disaster effects. Census data is highly confidential and very critical in nature and must be available for continuous operations 24 hours a day and 7 days a week. The ICM2000 software is comprised of two sub-systems; one to support headquarters operations and the other for field operations. All field operations use RAID technology and have no points of failure. All data recovery procedures are automatic and transparent to the end-user. The applications being developed will also interface with other decennial systems.
