- Conduct FOIA and Records Management Training

Privacy Services

- Deceris' Team of Privacy experts is familiar with M-03-22.
- We understand that a Privacy Impact Assessment (PIA) is an analysis of how information is handled to ensure that it conforms to the applicable legal, regulatory, and policy requirements
- Deceris understands that mitigating potential privacy risks requires:
 - Determining the risks and effects of collecting, maintaining and disseminating information in an identifiable form, and
 - Examining and evaluating protections and alternative processes for handling the information
- Deceris knows that the E-Government Act requires agencies to conduct a PIA before:
 - Developing or procuring IT systems or projects that collect, maintain or disseminate information in identifiable form from or about members of the public; or
 - Initiating a new electronic collection of information in identifiable form; or
 - Where a system change creates new privacy risks; and
 - That no PIA is required if information relates to internal government operations, has been previously assessed under an evaluation similar to a PIA, or where privacy issues are unchanged.

Privacy Requirements

Deceris' Team of Privacy experts are familiar with:

- Privacy Policies on Agency Websites; Privacy Policies in Machine-Readable Formats; Privacy Policies Incorporated by M-03-22;
- Agency Privacy Activities/Designation of Responsible Official
 - Which requires all federal employees and contractors to remain mindful of privacy and their obligation to protect information in identifiable form;
- Reporting Requirements and Sec. 208 Privacy Provisions.
 - Like the officials at the Department of Veterans Affairs we are committed to protecting the privacy of the American people.
- Deceris' Team of Privacy experts are very familiar with the Privacy Act of 1974.

Privacy Past Performance

Deceris' Team of Privacy experts have worked with:

- The Department of Veterans Affairs Records Management Program
- The Air Force at RAF Mildenhall, England
- The White House at the National Security Council, in the Office of Information Policy and Security Review
- The CIA, FBI, DoD, Information Security Oversight Office (ISOO),
- The National Archives
- Many other federal agencies in processing public request under the Freedom of Information Act, Privacy Act and Mandatory Review.
